

Technical Quick Guides

Wireless Alarm Hub on NVR for Arm and Disarm

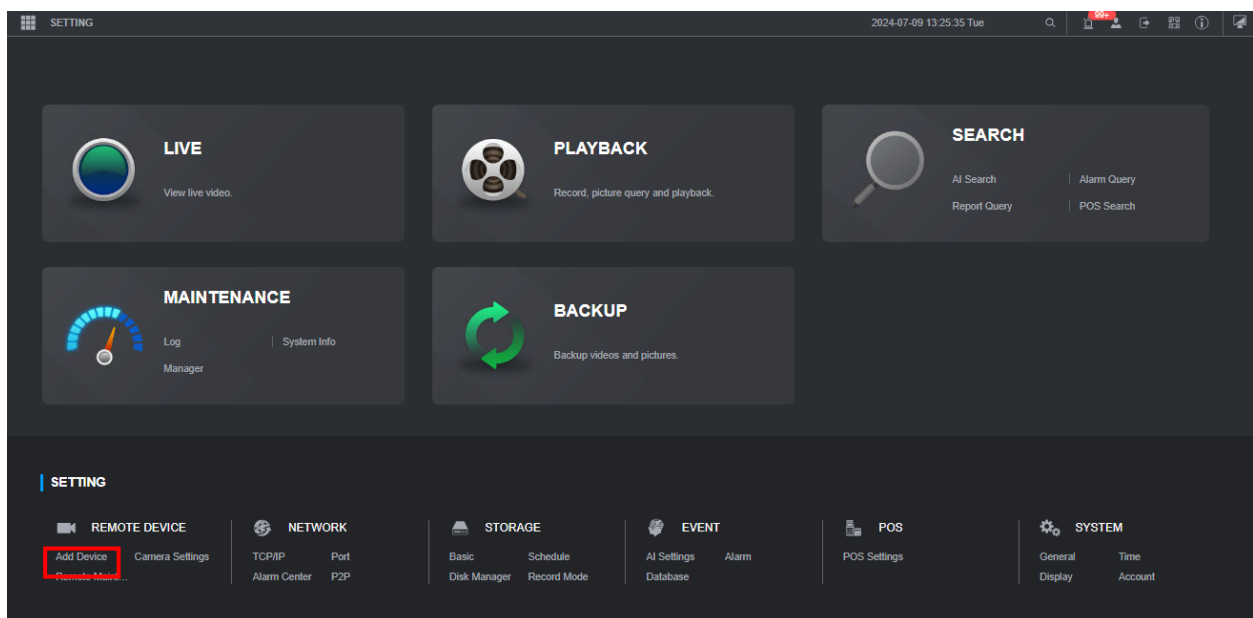

Make sure the wireless alarm hub is setup correctly before proceeding with this setup

Add the Peripherals to the Hub as needed, in this case I added a Dahua Key Fob for Quick Arming and Disarming

Log in to the **NVR**

Click the **Add device** on the Remote Device tab

Please contact your local Seadan store for more information & feedback

Click IoT tab

Alarm Hub

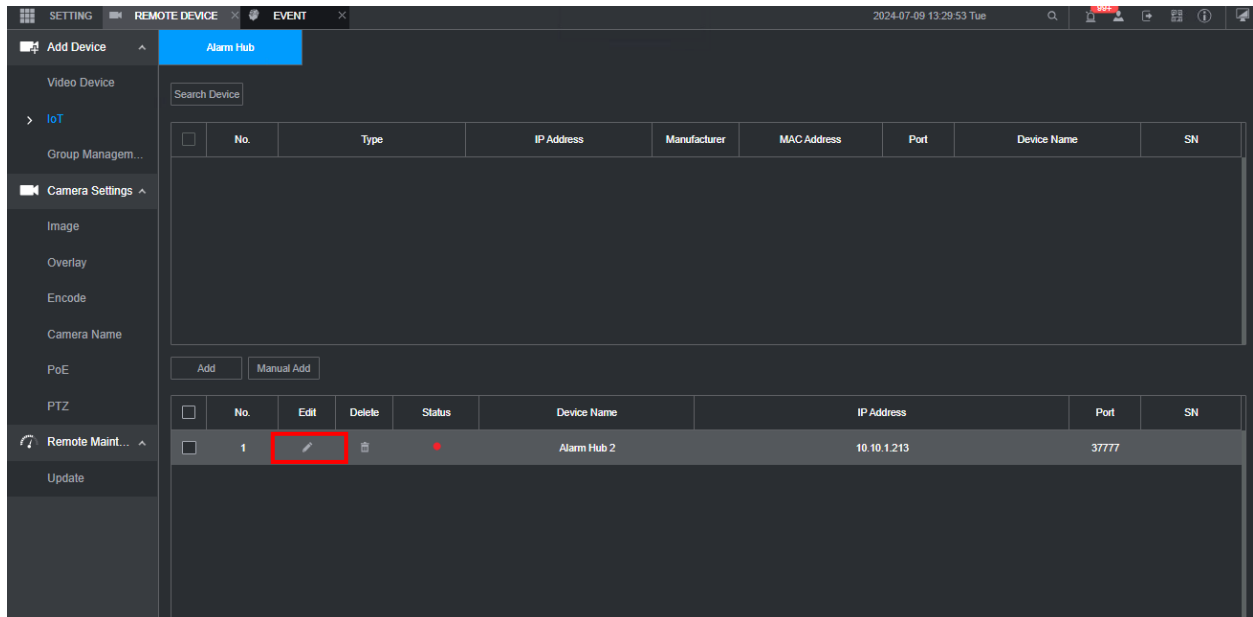

Search Device

<input type="checkbox"/>	No.	Type	IP Address	Manufacturer	MAC Address	Port	Device Name	SN
<input type="checkbox"/>	1	DH-ARC3800H-FW2	10.10.1.213	Private	d4:43:0e:5e:4b:8f	37777	Alarm Hub 2	AC06B19PAJ00014

Add Manual Add

<input type="checkbox"/>	No.	Edit	Delete	Status	Device Name	IP Address	Port	SN
--------------------------	-----	------	--------	--------	-------------	------------	------	----

After Adding the device click the **Edit** (Pencil icon)

Re – type the **Password**, make sure all the details are correct and → click the **OK** button.

The 'Edit' dialog box shows the following fields:

- Device Name: Alarm Hub 2
- Manufacturer: Private
- IP Address: 10.10.1.213
- TCP Port: 37777
- Username: admin
- Password: (masked with dots, highlighted with a red box)

Buttons: OK, Cancel

The **status** should indicate a green indicator

The screenshot shows the 'REMOTE DEVICE' tab with the 'Alarm Hub' sub-tab selected. A table lists the connected devices. The 'Status' column for the first device, 'Alarm Hub 2', shows a green dot, indicating it is online.

No.	Type	IP Address	Manufacturer	MAC Address	Port	Device Name	SN
1	Alarm Hub	10.10.1.213			37777	Alarm Hub 2	AC06B19PAJ00014

Click the **Group Management** tab and → click the “+” icon on the Group list.

The screenshot shows the 'REMOTE DEVICE' tab with the 'Group List' sub-tab selected. The 'Group Management' option in the left sidebar is highlighted. The main area shows a table for managing groups, with a '+' icon in the top right corner of the table header.

No.	Name	Type	Arming Status	Linkage Mode	SN	Details	Delete

Enter the **Group Name** that you want and → click the **next** button.

Go back to the Dashboard and Click the **Alarm** on the Event Tab

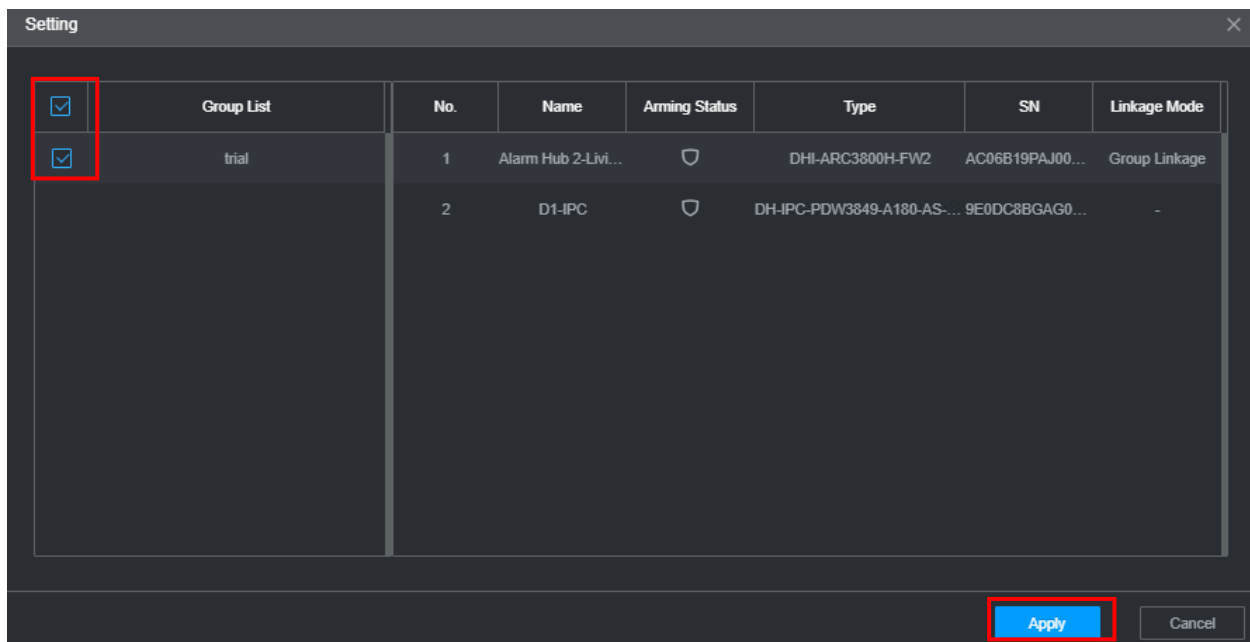

Under Alarm select the Alarm Hub and check for the **status** if the devices are online.

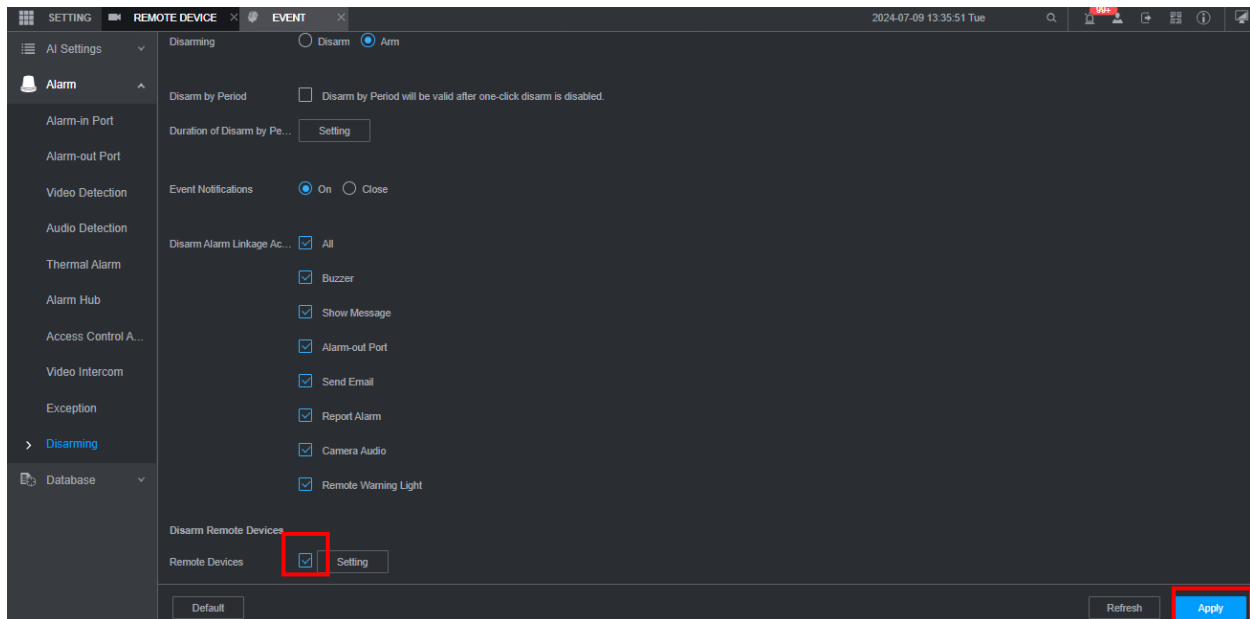

Under Alarm tab click the **Disarming** and → click the **Settings** on the Remote Devices

On the Setting window click the **check box** of the group list and → click **Apply** button.

Make sure that the **check box** on Remote Devices is checked and then click **Apply** button.

After the setup the device will reboot automatically to take effects the changes.

Go back to the Remote Device tab and select the Group management to see the status of the devices. Green means the device is armed and grey means the device is disarmed
