

## Technical Quick Guides

### Playback

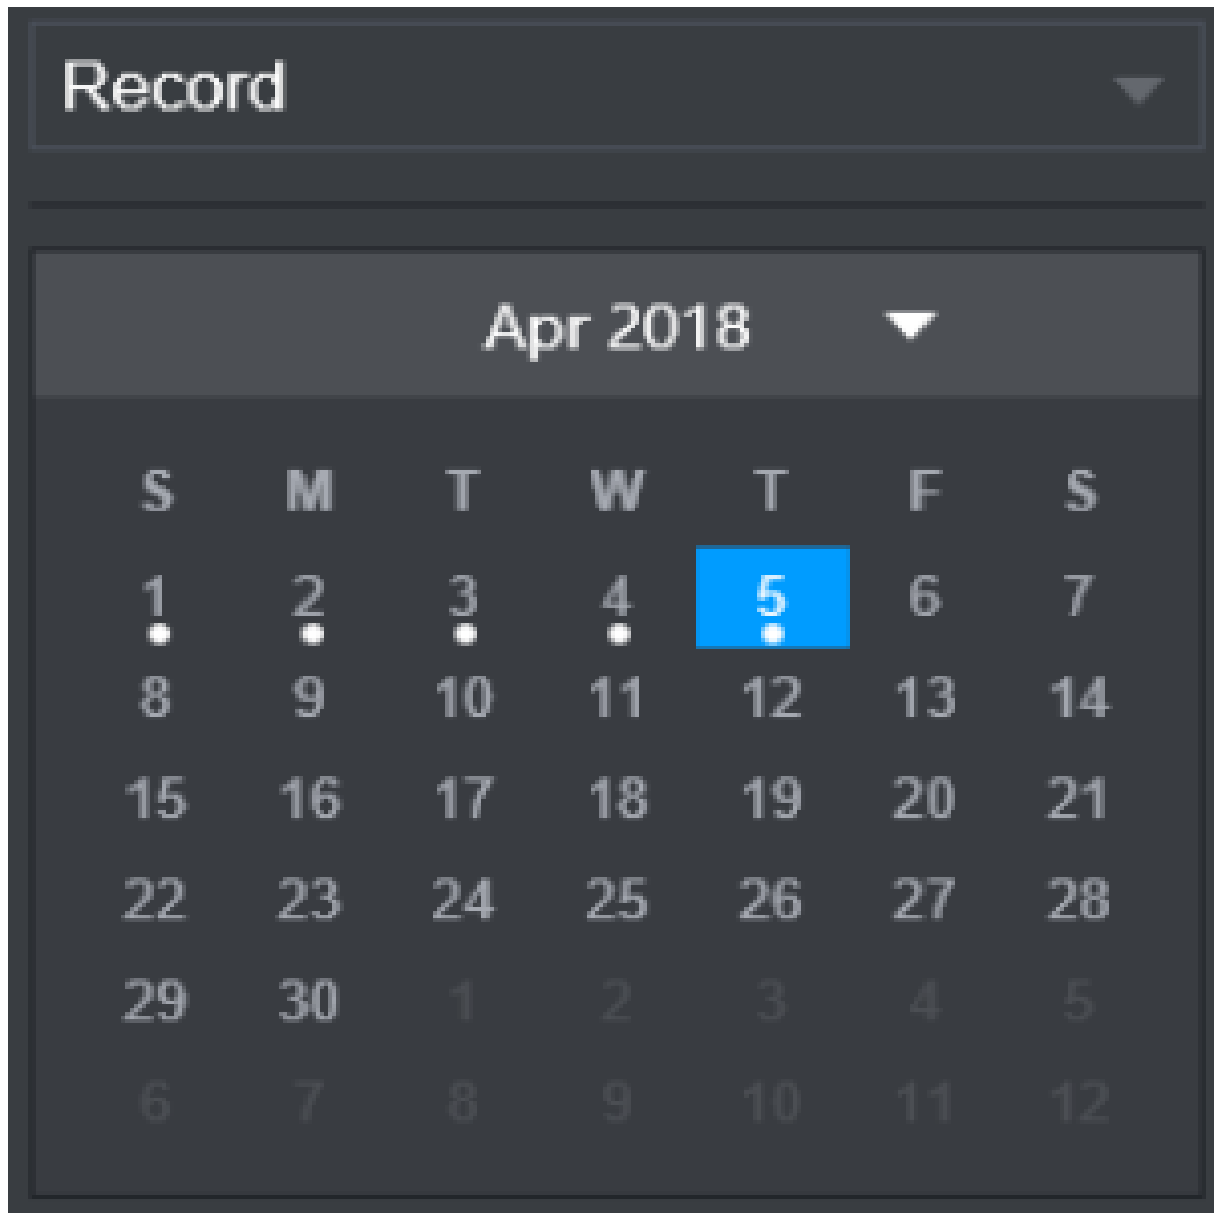

Log into the NVR with your username and password. Once logged in select the video tab.

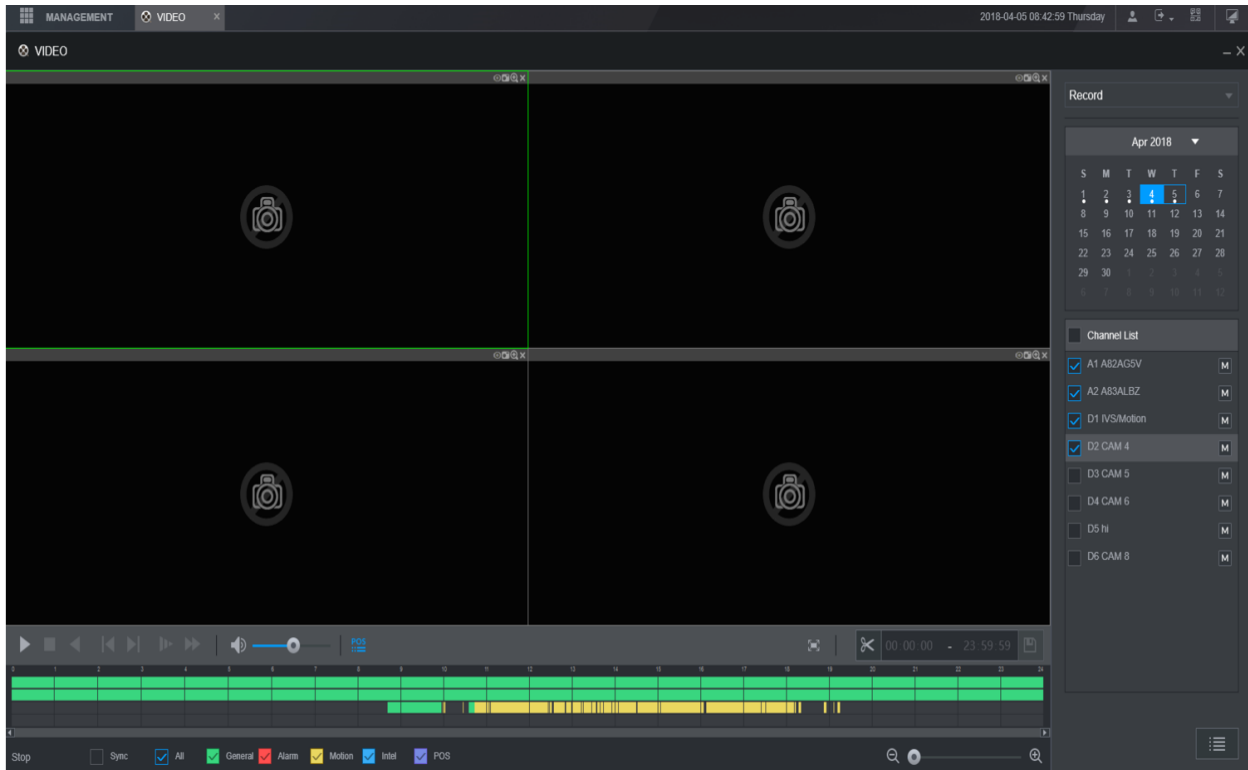

Once the video tab has been opened there is a calendar on the right-hand side. Select the date which you want to playback.

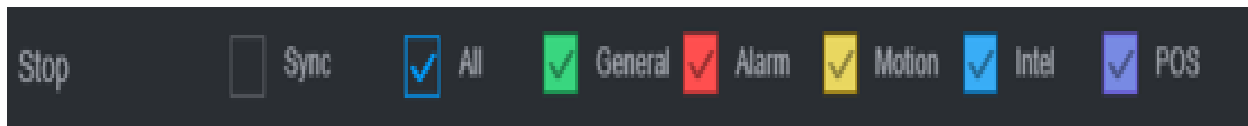

The days on the calendar which have a white dot underneath the date have recordings which can be played back

The footage will appear on the timeline underneath the video feed. The colour which is underneath corresponds to what type of recording has been captured.

From the list of type of recording has been captured select/deselect what kind of recording you want to view.

On the bottom graph double click on the time you want to view with playback.
