

Technical Quick Guides

Passive PoE Transmission of IPCOM CPE

Below is a table for the passive PoE transmission distance of the IPCOM CPEs

Passive PoE distance is from the Passive PoE injector to the CPE device. For CPE12 and CPE13 which support standard PoE, the maximum distance can be extended to 100m.

Model	Passive PoE Voltage	Passive PoE Distance (m)	Standard PoE Distance (m)
ICMCPE3	9-12V	30	N/A
ICMCPE5	9-13V	60	N/A
ICMCPE9	11-13.8V	60	N/A
ICMCPE6S	11-13V	60	N/A
ICMCPE12	9-24V	60	100
ICMCPE13	21-25V	60	100
iLBE-5AC	21-25V	60	N/A
ICMBS9	21-25V	60	N/A
