

## Technical Quick Guides

### Changing IVS Sensitivity

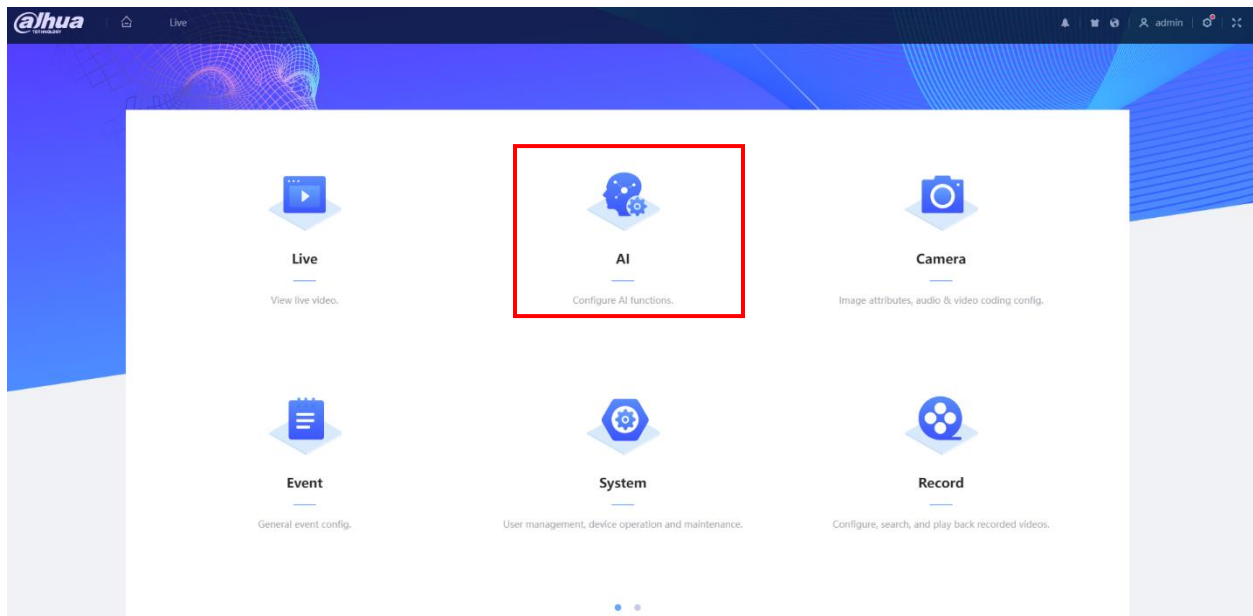

Log in first on Camera web interface

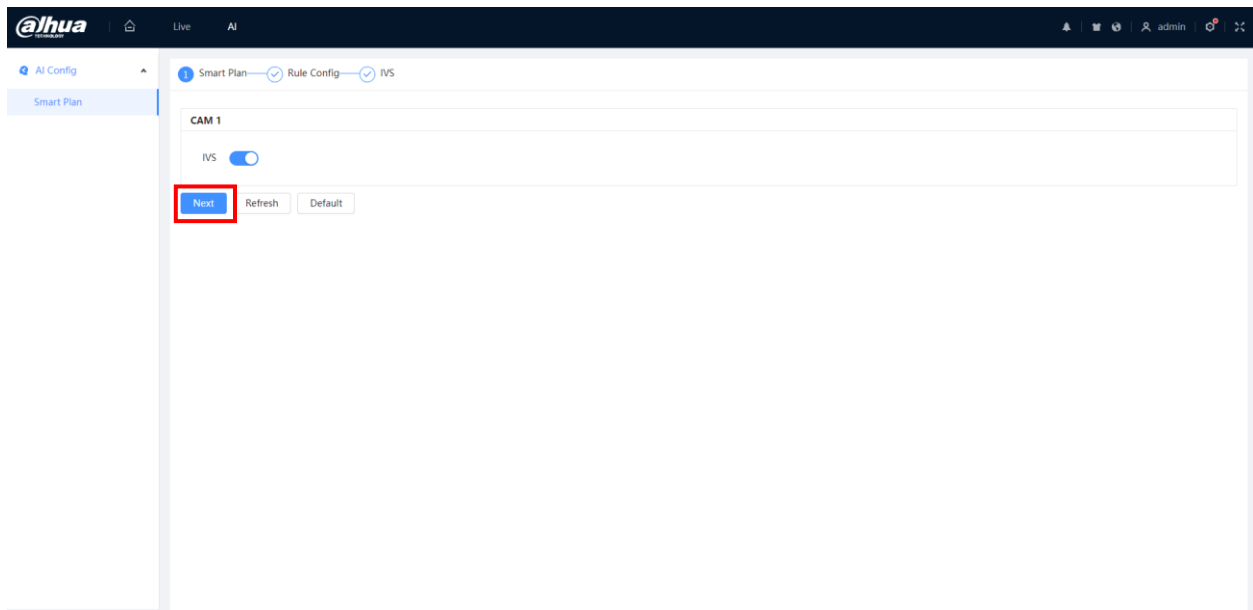

Click the Home icon at the upper right of the screen

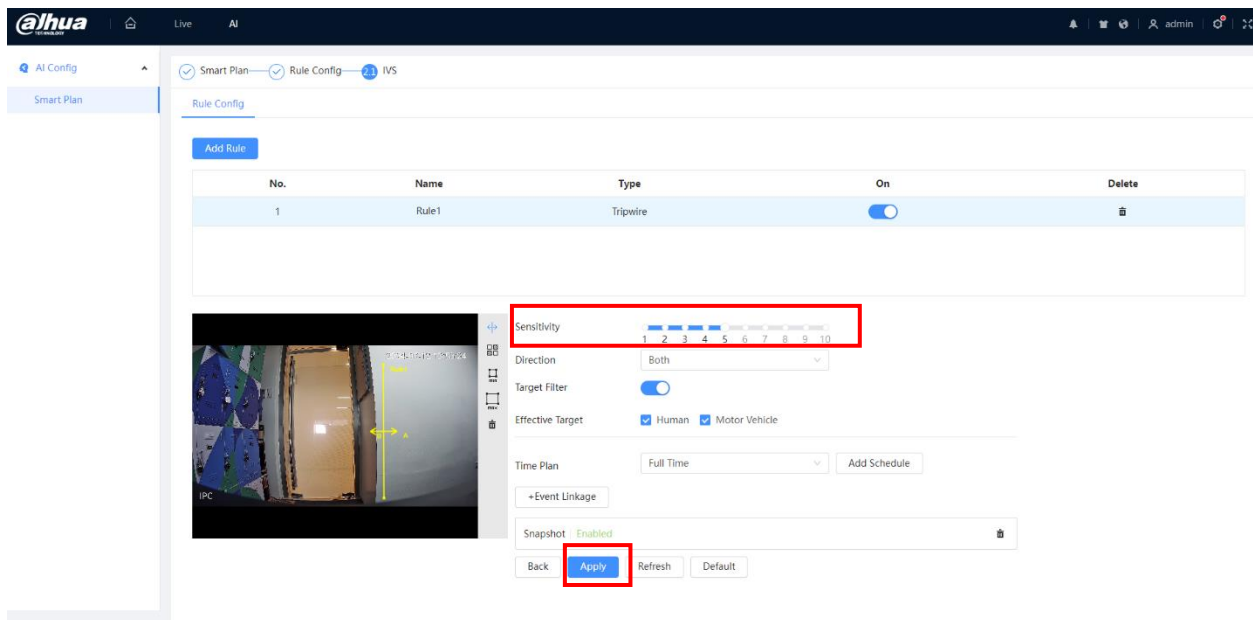

## Select AI

## Click Next

Adjust Sensitivity base on your preference and click **Apply Button**

The screenshot displays the Dahua AI Config web interface. The top navigation bar includes the Dahua logo, 'Live' status, and 'AI' menu. The left sidebar shows 'AI Config' with sub-options 'Smart Plan' and 'Rule Config'. The main area is titled 'Rule Config' and contains an 'Add Rule' button and a table of existing rules.

No.	Name	Type	On	Delete
1	Rule1	Tripwire	<input checked="" type="checkbox"/>	

Below the table, a configuration panel for the selected rule is shown. It includes a video preview on the left and settings on the right. The 'Sensitivity' slider is highlighted with a red box and is set to 4. Other settings include 'Direction' (Both), 'Target Filter' (Both), 'Effective Target' (Human, Motor Vehicle), 'Time Plan' (Full Time), and 'Snapshot' (Enabled). The 'Apply' button is also highlighted with a red box.
