# Technical Quick Guides

**Uniview Setup Intrusion and other VCA via UNV Link Pro**
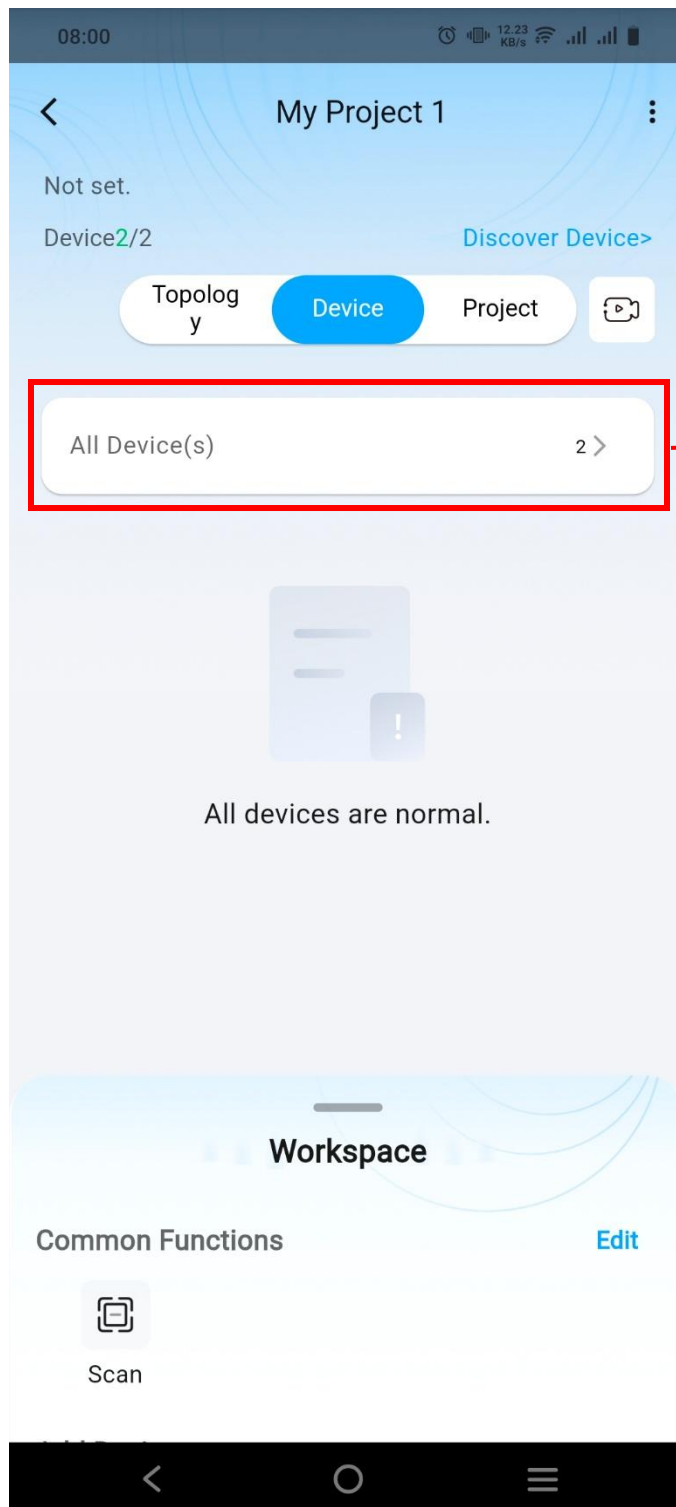

## Open the **UNV Link Pro App**

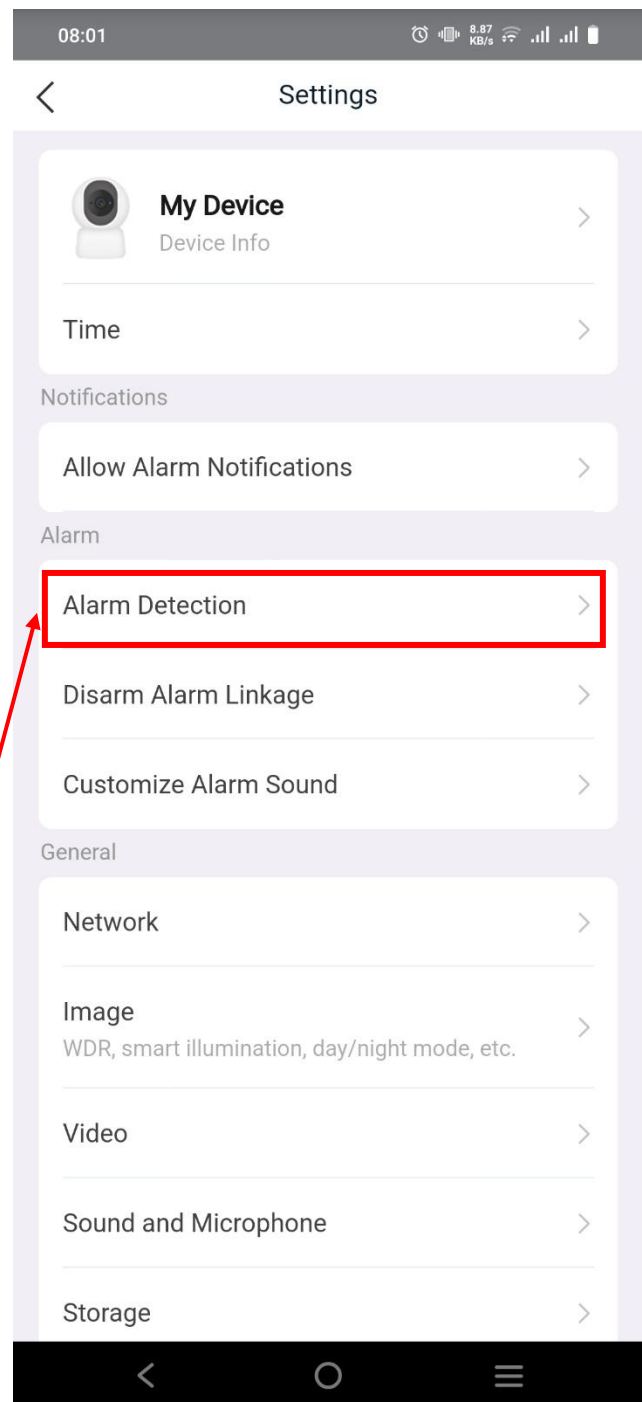

## Select **Device**

Click **All Device(s)**

Click the 3 dots at the device you want to access
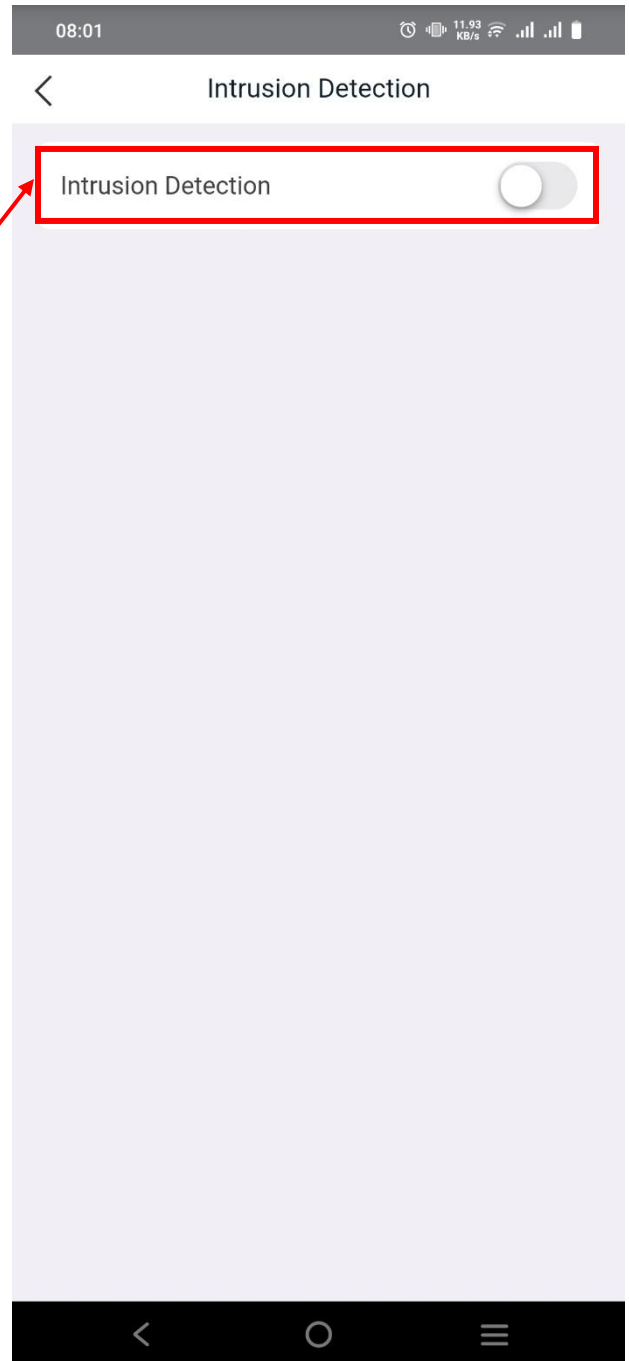

Click **Device Config**
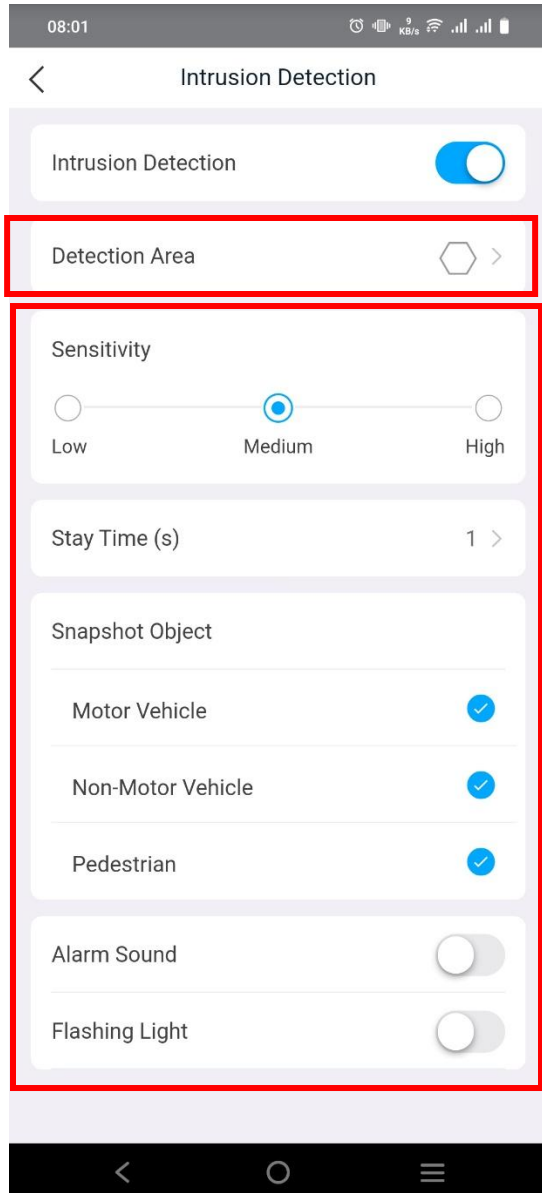

Select **Alarm Detection**

Select the Type of Alarm Detection you want to setup, for this we will setup Intrusion

Enable the **Intrusion Detection**

Once enabled, you can setup the parameters, as well as the **Detection Area**

Adjust the detection area base on your requirements
