# Technical Quick Guides

**Adding PIR Peripherals on Alarm Hub using DMSS**

Open the DMSS App and click the Alarm Hub you set up
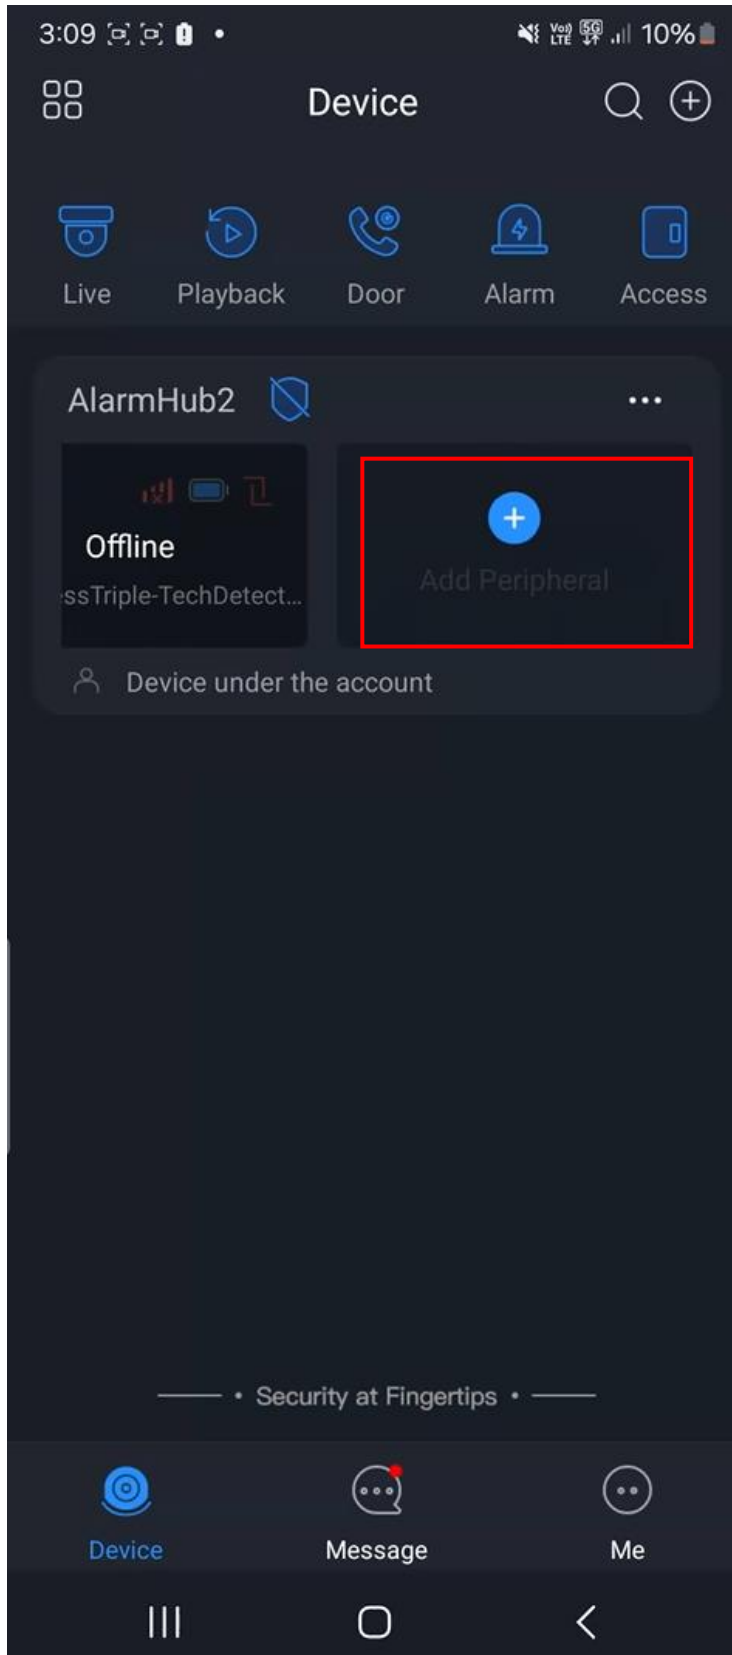

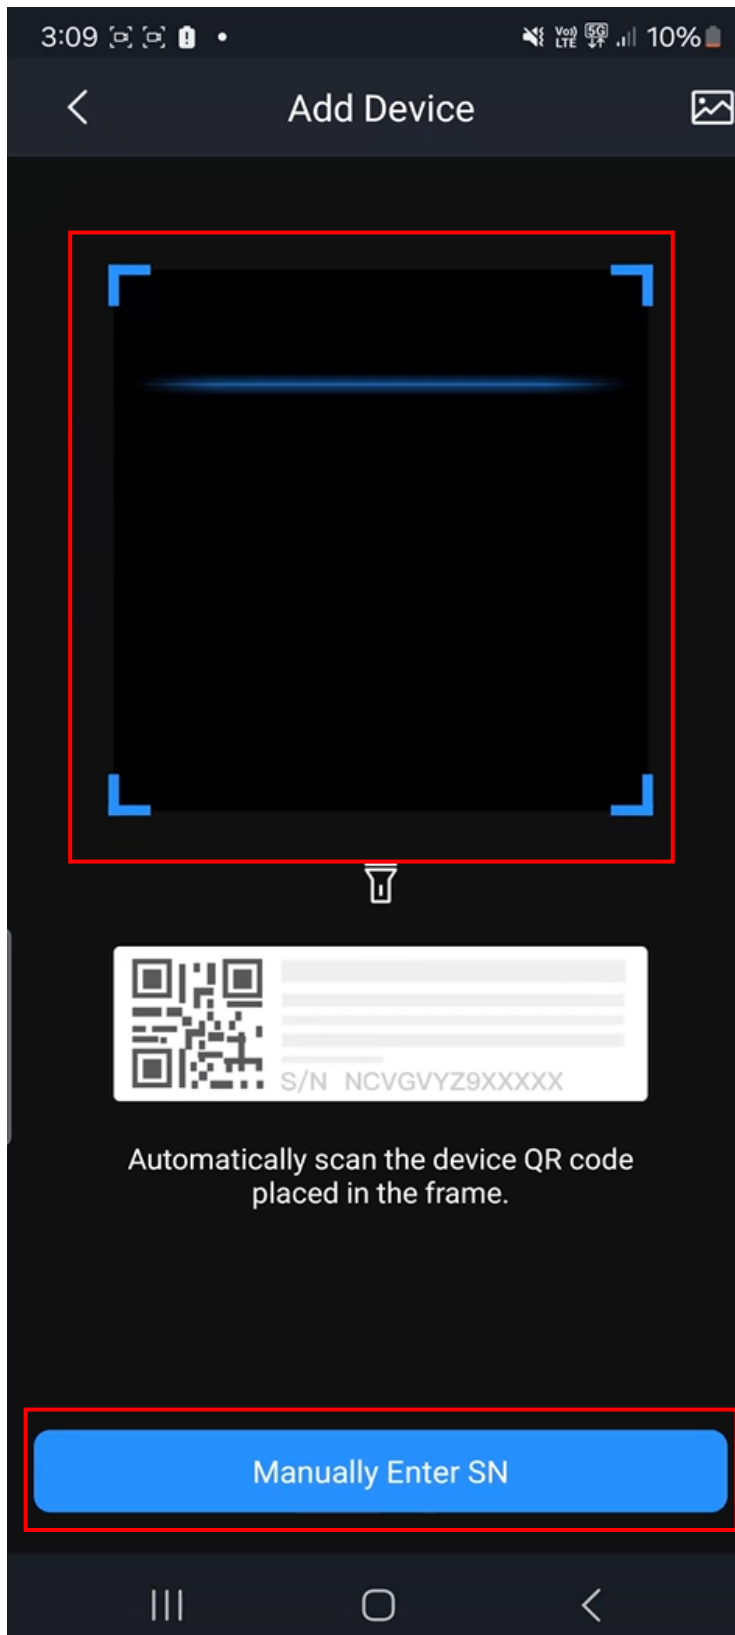

Click the Peripheral and the + icon on the bottom

Or go back to the Main Device and slide the Alarm hub to the Right
to show the Add Peripheral tab then click the + icon

Scan the QR code at the back of the PIR or manually Enter the SN

Click the Next button

Continue the process and click the Next button
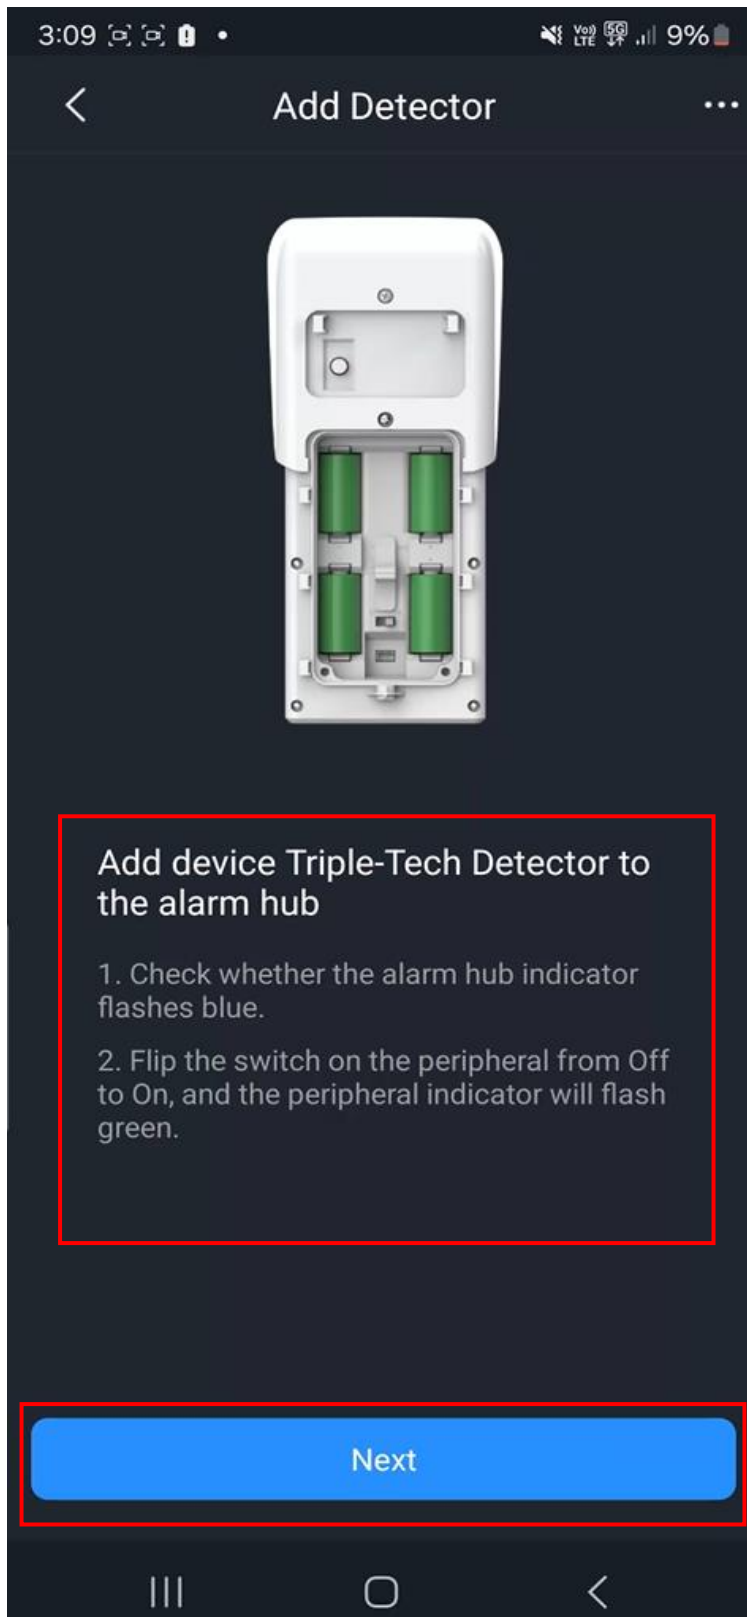

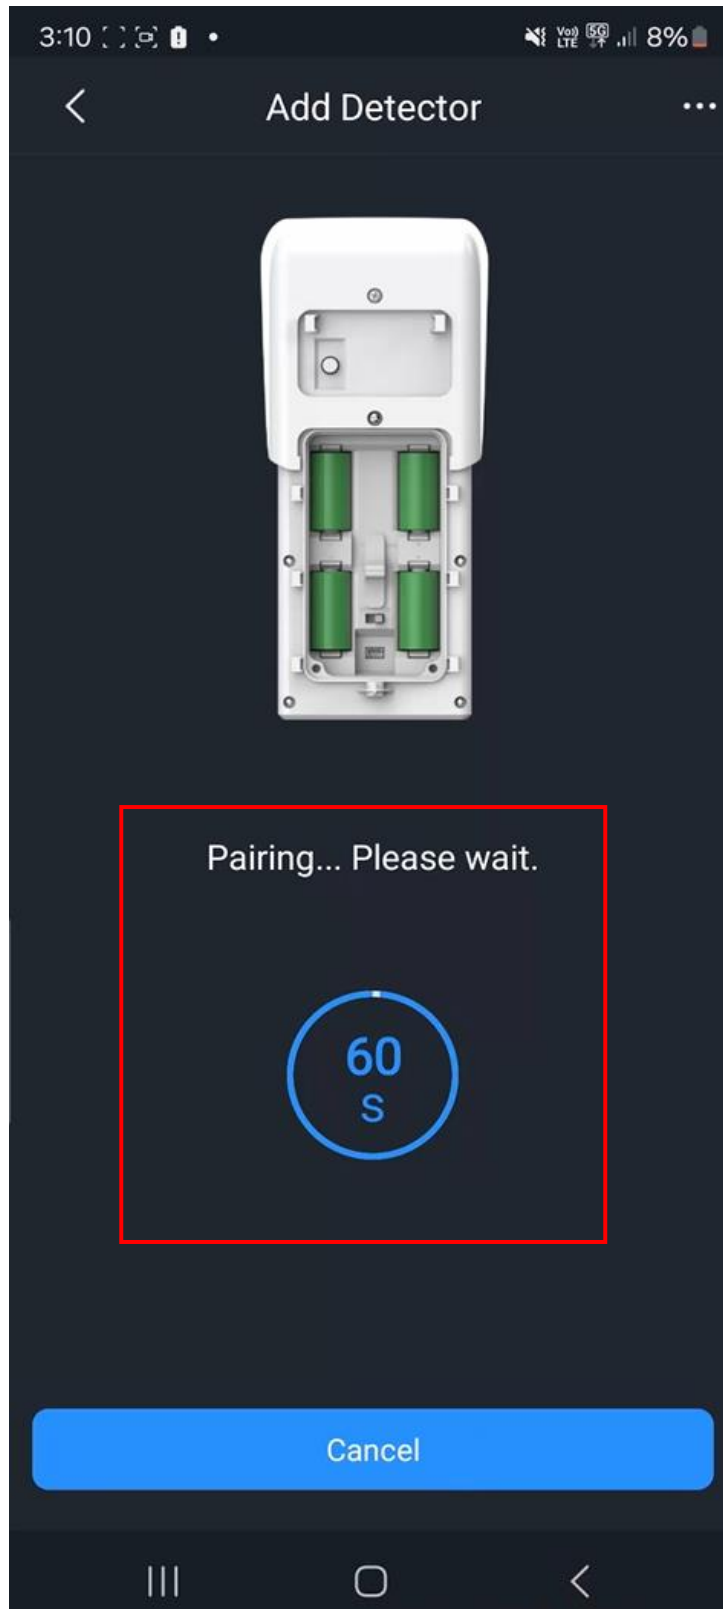

Continue the process and click the Next button.

Follow the instructions on the screen before clicking the Next button.

Wait until it completes the pairing process.

Once completed click the Done button.

You can see the PIR device you add on the device tab, just slide the alarm to the right.

IF the PIR has camera attached you can add by clicking the PIR tab and click the Add camera button

Wait until it completes adding the camera

When completed click the Completed button and wait until it updates the icon on the DMSS.

Put back the back plate and Test the device.
