Adding PIR Peripheral on Dolynk Care
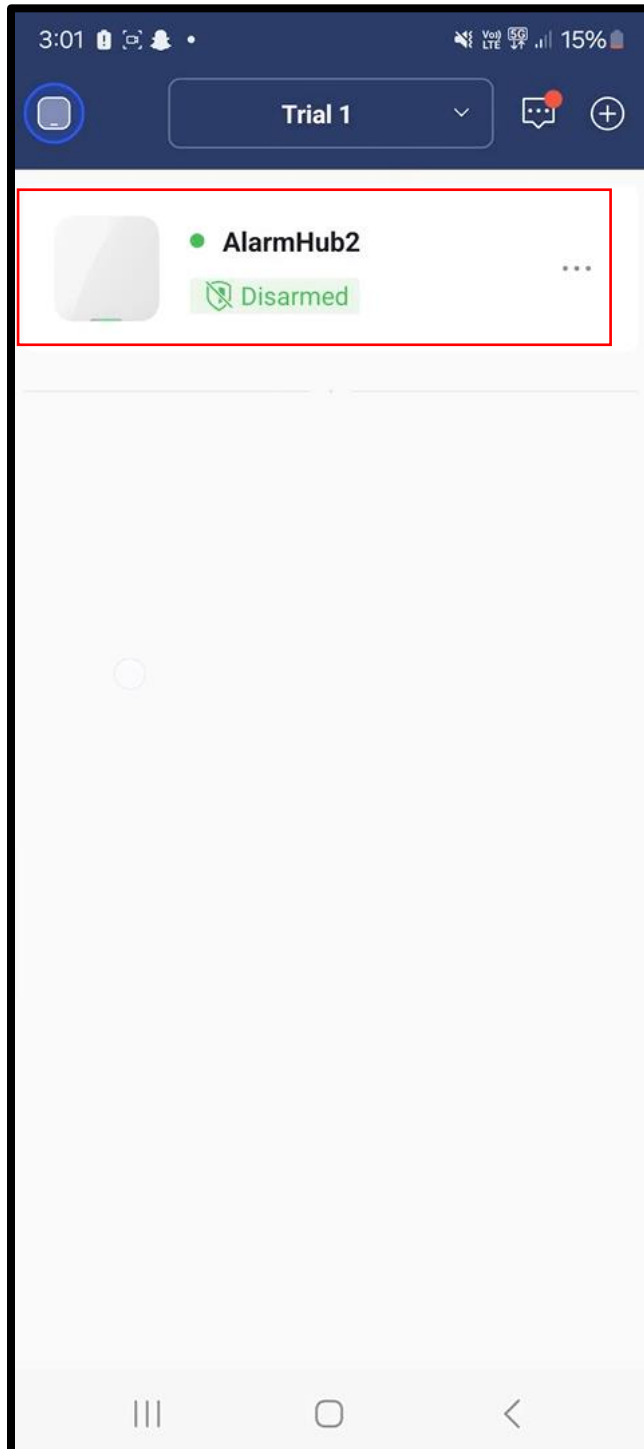

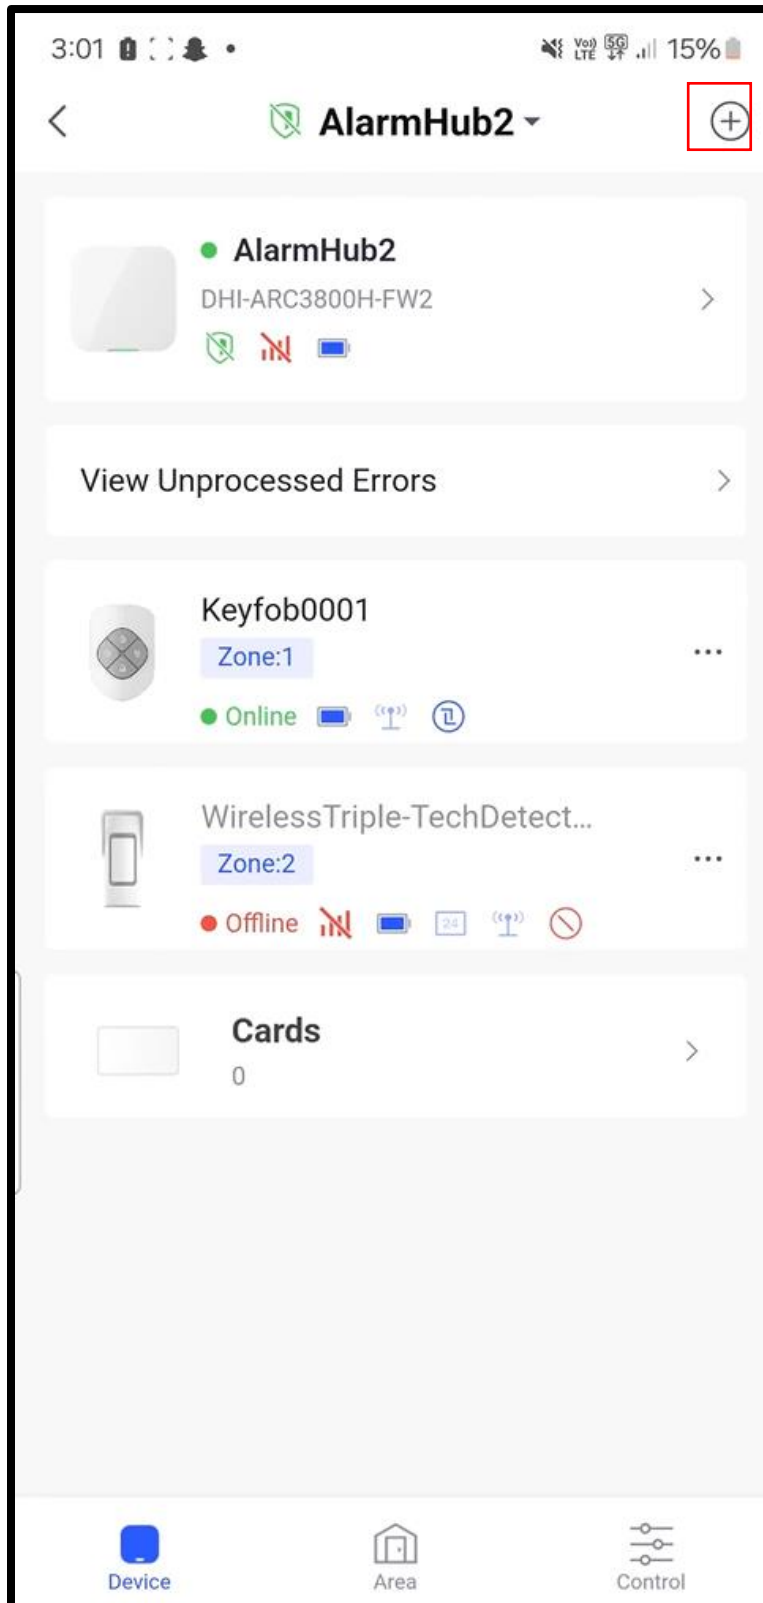

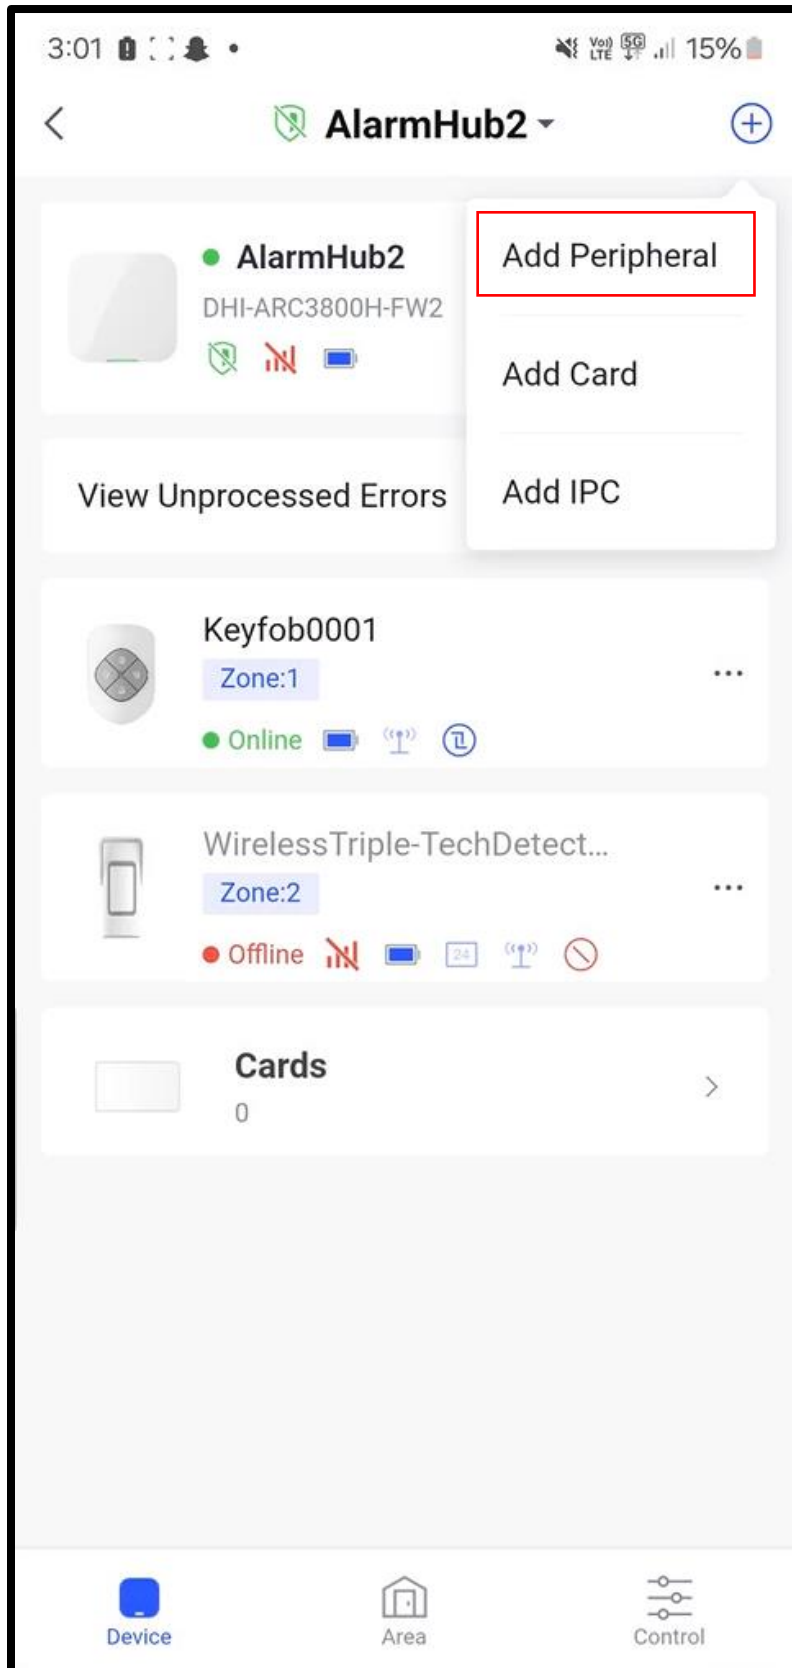

Open your Dolynk Care, click the Alarm hub you set up

On the Alarm Hub tab click the Add icon

Click the Add button on the upper left corner, select Add Peripheral

Scan the QR code of the PIR

Click the Next button

Continue the process and click Next

Click the Next button
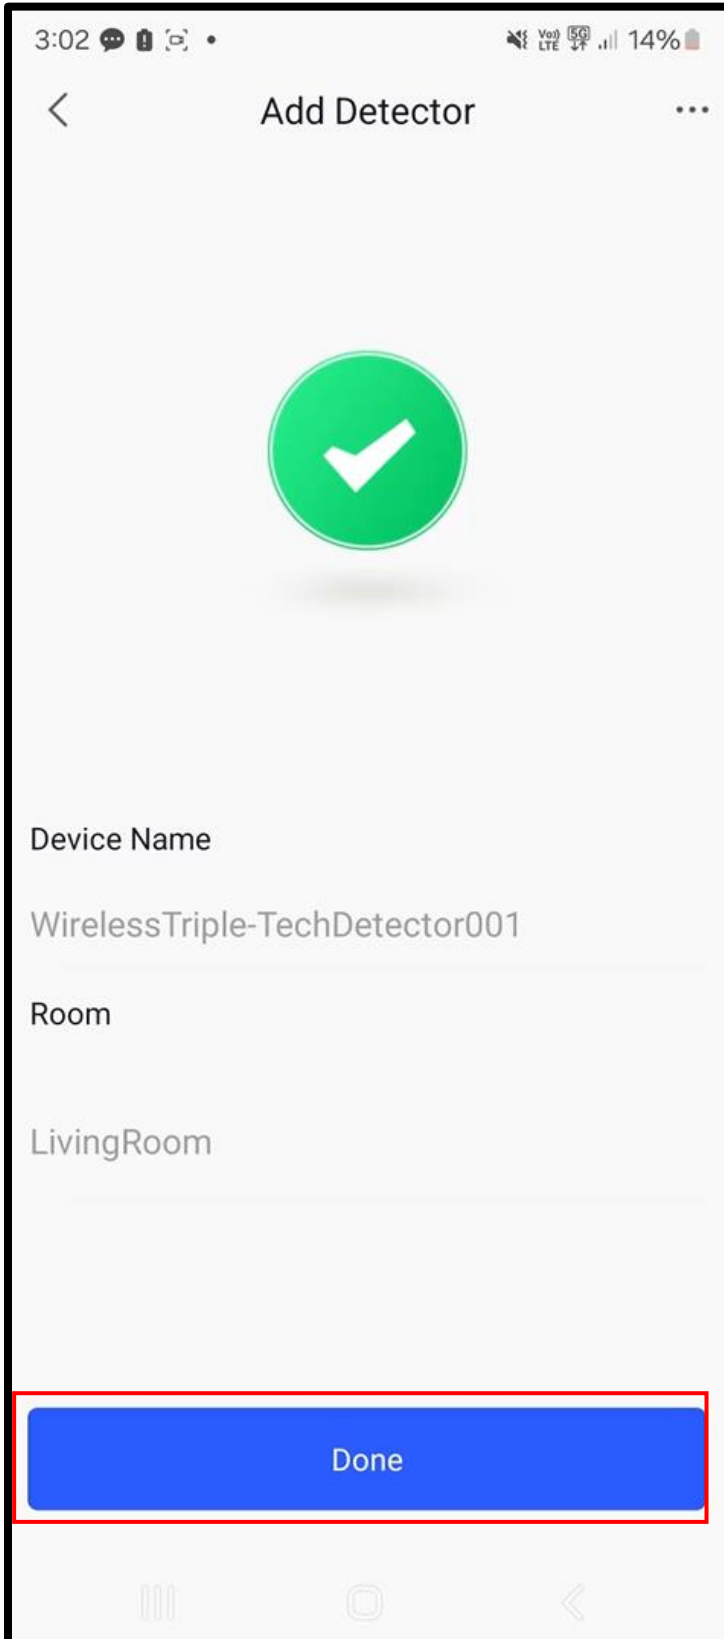

Follow the Instructions on the screen first before clicking the Next button

Add Detector

Before clicking "Next", perform the following operations:

1. Check whether the alarm hub indicator flashes blue.

2. Flip switch on accessories from Off to On. The peripheral indicator flashes green.

Next
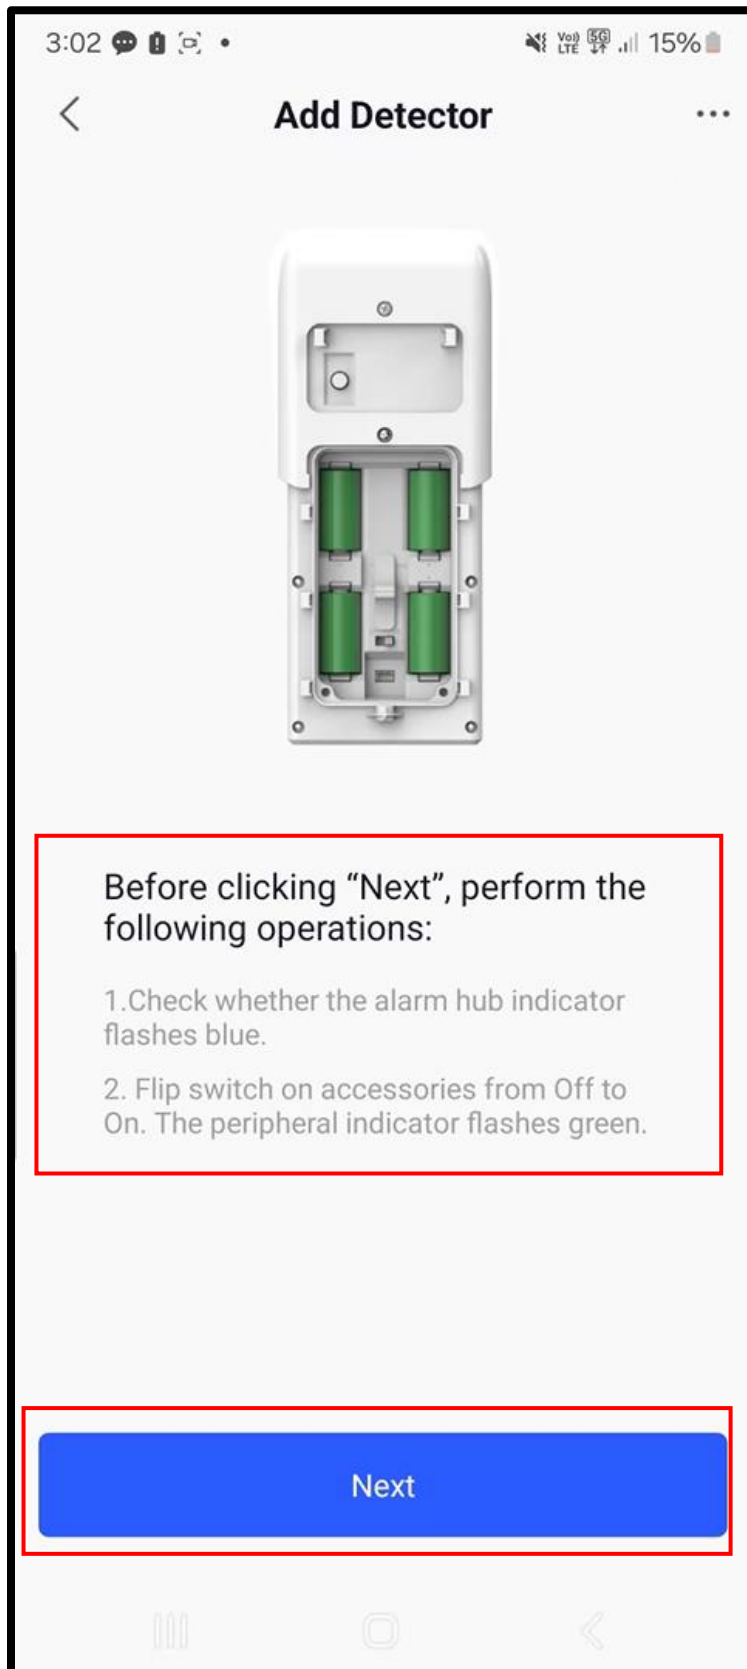

Wait until it completes pairing
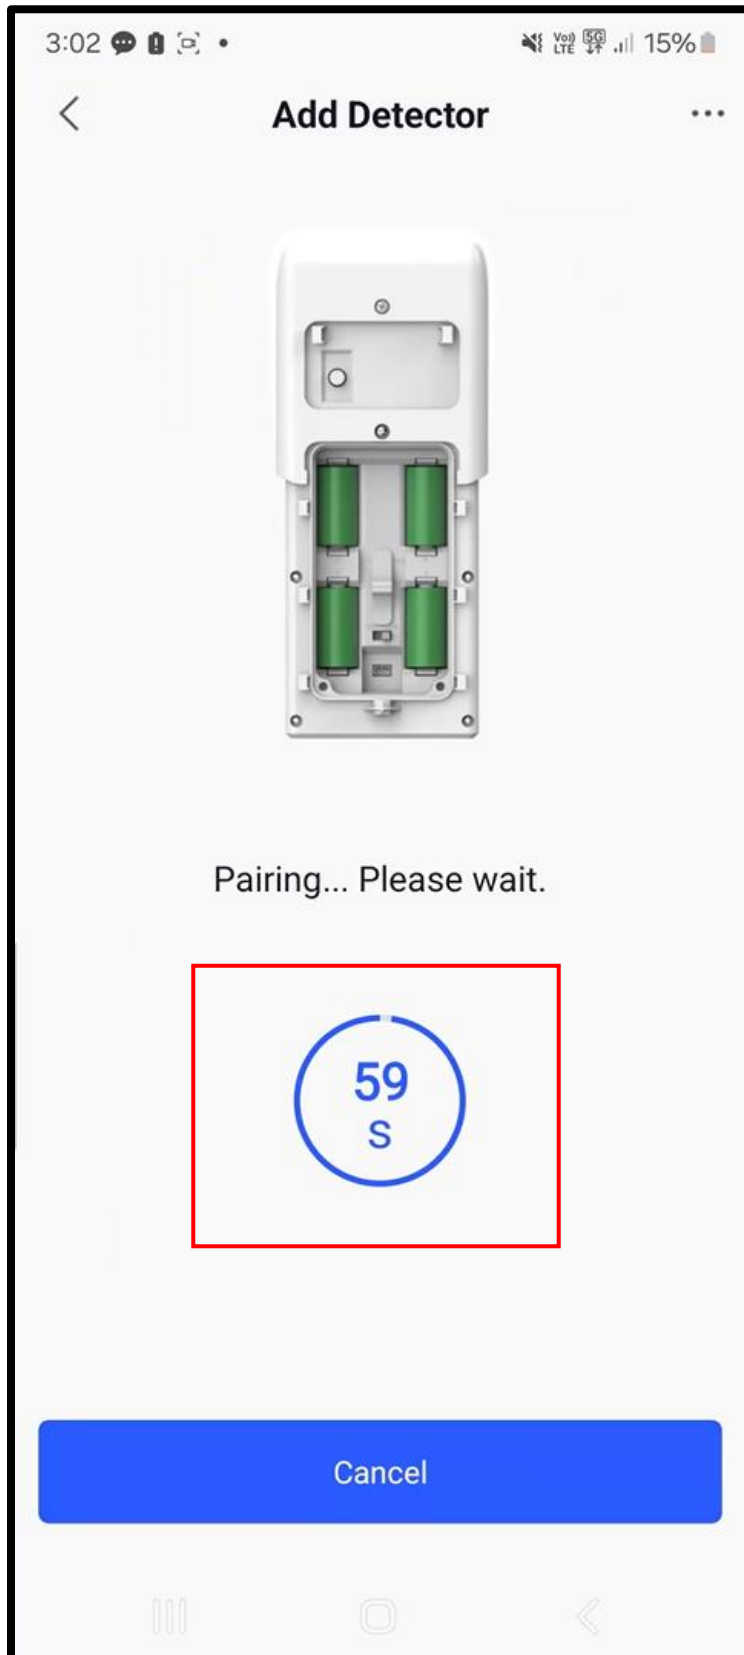

Continue the process and click the Done button

The Added PIR will appear on the device list of the alarm hub

Put the backplate of the PIR and Test the device
